average wait  
time**

## FEATURES

### CONVENIENT

Contactless and effortless, no need for customers to download or register. Through assigned QR codes for each table, allow customers to pay, order, and call for service using their personal smart devices.

### CUSTOM MENU AND SERVICES

Provide customers with an interactive menu that automatically displays or conceals specials depending on time and date, an option to choose the preferred method of payment, language, and staff service. The use of one to one marketing will help customers navigate through their preferences.

### LIVE MENU

Create a menu with live query & filtering, full configuration of variants, and additional features upon request. Responding to customer queries and needs is on top priority.

### INSIGHTFUL DATA

Get your hands on elaborate dashboards to keep track of your income and expenses alongside the benefit of thrift order and payment experience.

## BENEFITS

### BOOST IN PROFITS :

Cost effective service reduces expenses, while an eye catching menu increases customers' inclination to make a buy.

### STAY CONNECTED

Stay updated on customer behavior which will help in studying buying patterns. This information will be used in developing the right market-oriented policies to develop a strong customer base.

### NO DOWNLOADS:

Save on paper through digital menus that can be updated without downloading any application. This will lead to fulfillment of corporate social responsibility which will help earn customer goodwill.

### EASE OF PAYMENTS

Empower your customers with the power on online payments from the safety and comfort of their own phones.

### CUSTOMIZED EXPERIENCE

Give your customers the flexibility and power to choose from custom menus, preferred method of payment and services. A personalized marketing approach is an effective tool to win customers.

### CALL ASSISTANCE

Faster delivery, minimized mistakes and customized service increases customer satisfaction. If the quality of services is maintained, repeat business can help with higher profits and future growth.
